| EXP 5 | Entry of Sample Data |
|---|---|

## Aim:

To load sample books and members and to record sample issue transactions through the forms.

## Theory:

Sample data is needed to test the reports, the business rules and the dashboard.

- **Bulk load:** A Deluge function loadSampleData() inserts eight books and five members in one run.
- **Form entry:** One book (Atomic Habits) and one member (Sneha P) were entered through the live forms, and every issue/return was entered through the Book Issues form so that all validation and stock workflows ran.

## Sample books:

| Book ID | Title | Category | Total Copies |
|---|---|---|---|
| 101 | Clean Code | Technology | 3 |
| 102 | Introduction to Algorithms | Technology | 2 |
| 103 | The C Programming Language | Technology | 2 |
| 104 | A Brief History of Time | Science | 2 |
| 105 | Astrophysics for People in a Hurry | Science | 1 |
| 106 | Sapiens | History | 2 |
| 107 | To Kill a Mockingbird | Fiction | 2 |
| 108 | 1984 | Fiction | 1 |
| 109 | Atomic Habits | General | 2 |

## Sample members:

| Member ID | Name | Department | Status |
|---|---|---|---|
| 1001 | Arun Kumar | CSE | Active |
| 1002 | Priya S | AIML | Active |
| 1003 | Karthik R | ECE | Active |
| 1004 | Divya M | IT | Active |
| 1005 | Rahul V | MECH | Inactive |
| 1006 | Sneha P | CSE | Active |

## Procedure:

1. Go to Workflow > Functions > New Function, name it loadSampleData (namespace Default, return type void).
2. Write insert statements for the books and members and click Save, then Execute once.
3. Open the live Books form and add Atomic Habits (Total Copies 2, Available Copies left blank).
4. Open the live Members form and register Sneha P.

5. Open the Book Issues form and record the issues: Arun - Clean Code (01-Oct), Karthik - 1984 (10-Oct), Priya - Sapiens (15-Oct), Divya - Atomic Habits (21-Oct) and Sneha - Astrophysics (21-Oct).
6. Open the Issue Register report to check the entries.

## Program (part of loadSampleData function):

```
void loadSampleData()
{
    // one-time load of the sample library catalogue and members
    insert into Books
    [
        Added_User = zoho.loginuser
        ISBN = "9780132350884"
        Book_Title = "Clean Code"
        Author = "Robert C. Martin"
        Category = "Technology"
        Publisher = "Prentice Hall"
        Total_Copies = 3
        Available_Copies = 3
        Single_Line = "T-01"
    ];
    insert into Books
    // ... seven more books and five members inserted the same way
    info "Books: " + Books[ID != 0].count() + " | Members: " + Members[ID !=
0].count();
}
```

## Output:

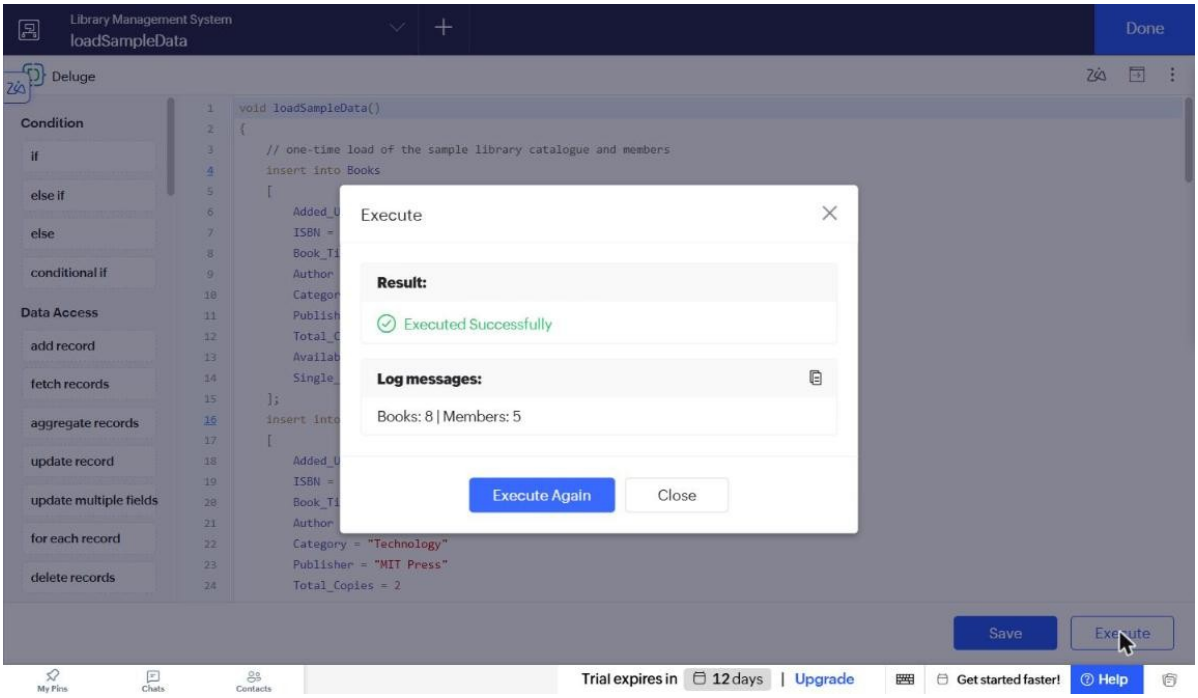

*Fig. 5.1: loadSampleData executed - Books: 8, Members: 5*

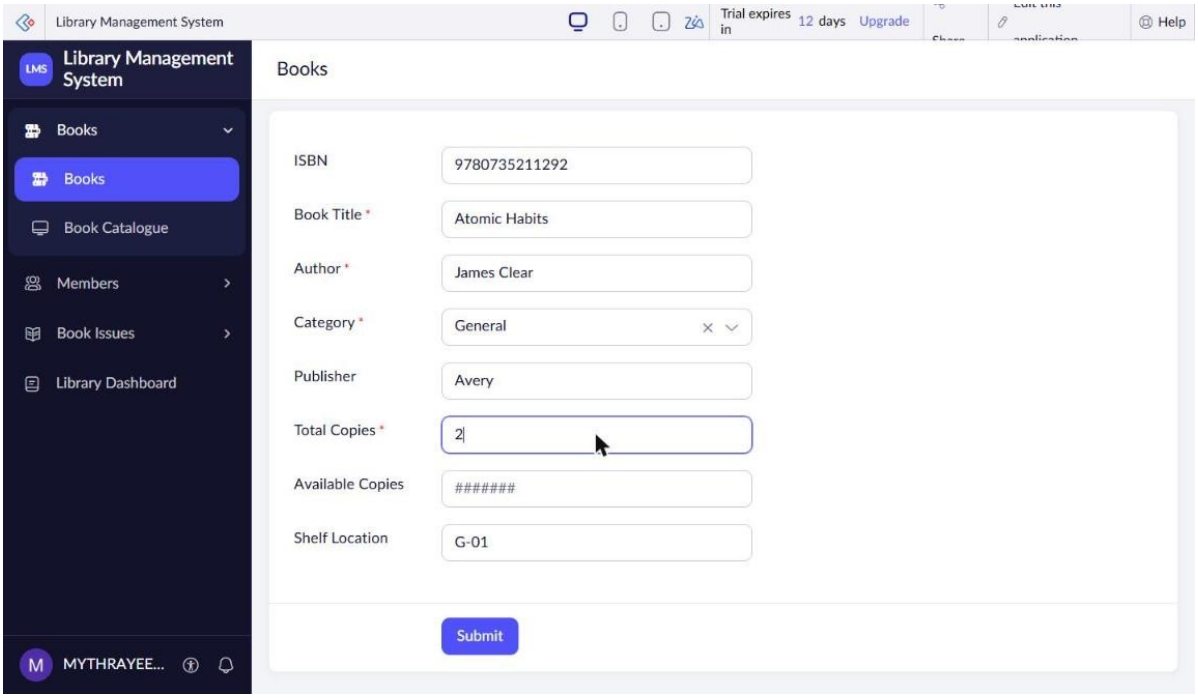

*Fig. 5.2: Book entered through the Books form*

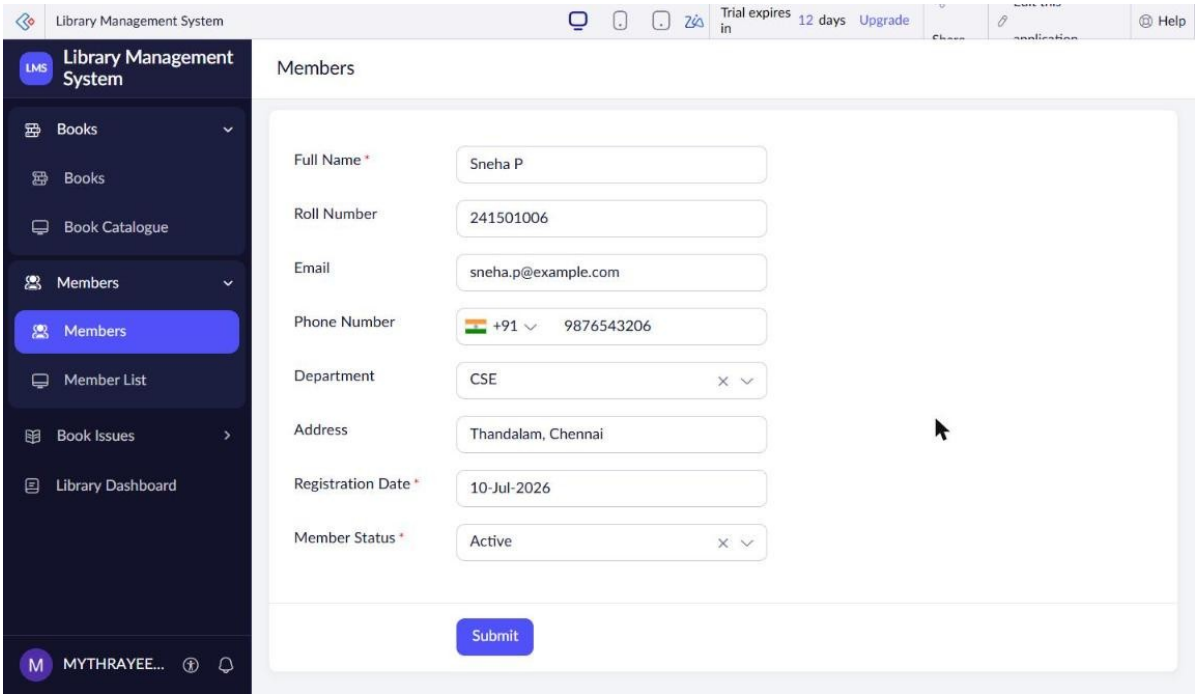

*Fig. 5.3: Member entered through the Members form*

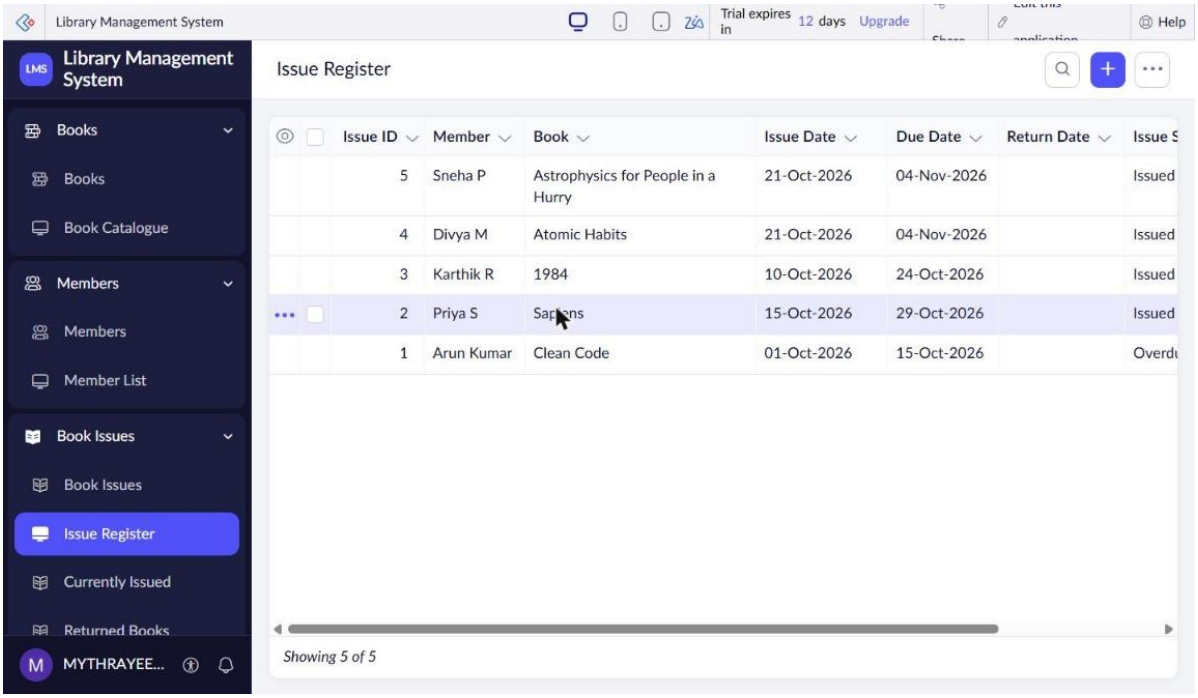

*Fig. 5.4: Issue transactions in the Issue Register*

## Result:

Nine books, six members and five issue transactions were entered successfully and are available for testing.
