EXP 8	Currently Issued Books Report

Aim:

To create a report that lists only the books that are currently with members (not yet returned).

Theory:

Report criteria filter the records shown in a report. A book is currently issued when its Issue Status is not Returned, so both Issued and Overdue records are listed.

Procedure:

1. Click + > Report > List, choose the form Book Issues and name the report Currently Issued.
2. Open the report in the Application IDE and add the criteria [Issue_Status != "Returned"].
3. Save and open Currently Issued in the live application.

Program (Currently Issued report):

```
list Currently_Issued
{
    displayName = "Currently Issued"
    show all rows from Book_Issues [Issue_Status != "Returned"]
    (
        Issue_ID as "Issue ID"
        Member
        Book
        Issue_Date as "Issue Date"
        Due_Date as "Due Date"
        Return_Date as "Return Date"
        Issue_Status as "Issue Status"
        Single_Line as "Remarks"
    )
}
```

Output:

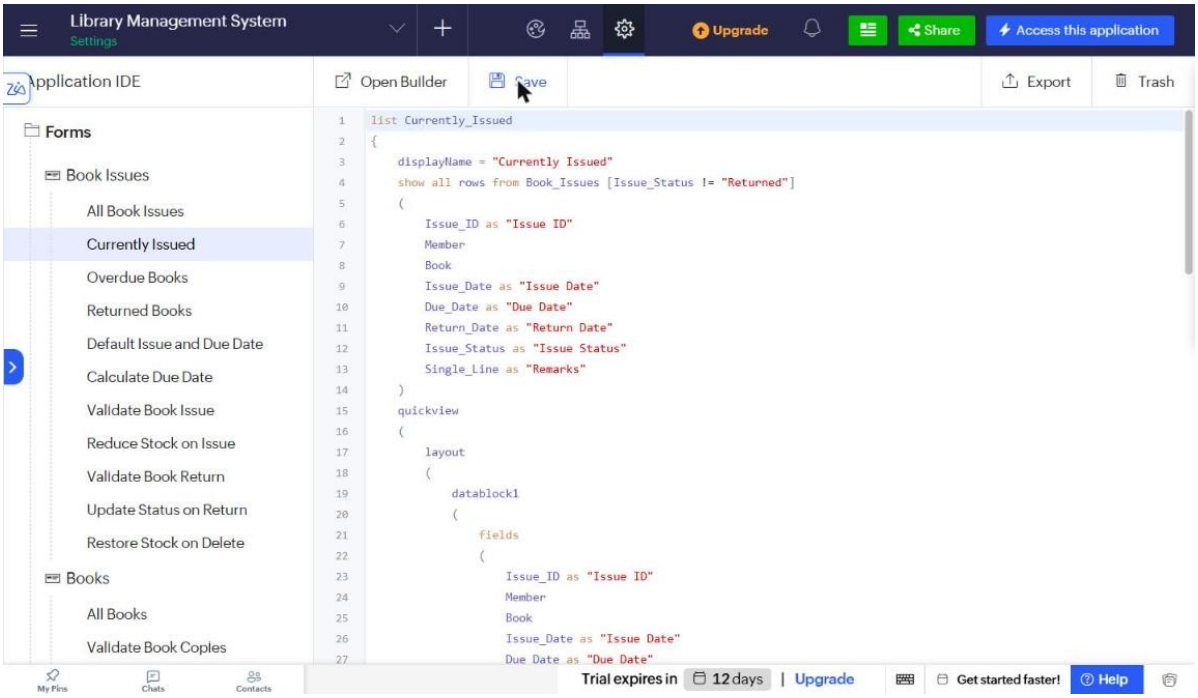

Fig. 8.1: Currently Issued report criteria

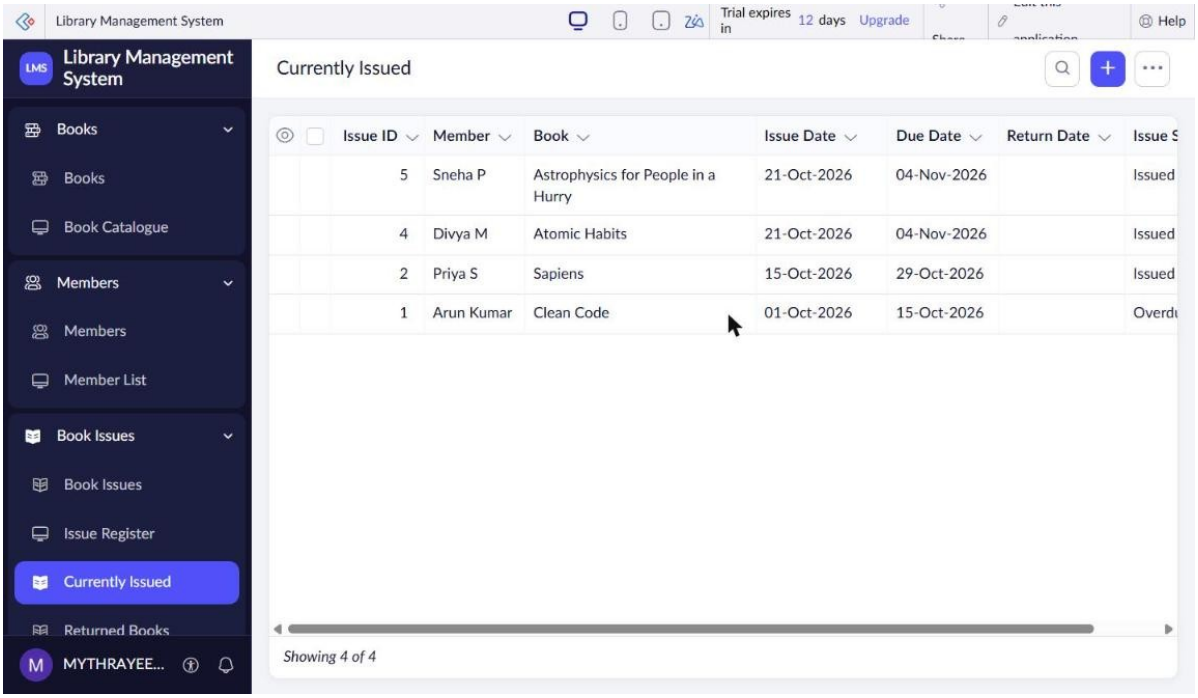

Fig. 8.2: Currently Issued report in the live application

Observation:

Issue ID	Member	Book	Status
5	Sneha P	Astrophysics for People in a Hurry	Issued
4	Divya M	Atomic Habits	Issued
2	Priya S	Sapiens	Issued

1	Arun Kumar	Clean Code	Overdue

Result:

The Currently Issued report lists the four books that are still with members; the returned book is excluded.
