EXP 9	Returned Books and Overdue Books Reports

Aim:

To create two reports: one for books that have been returned and one for books that are overdue.

Theory:

- **Returned Books:** Records with Issue Status = Returned.
- **Overdue Books:** Records with Issue Status = Overdue, and also records still marked Issued whose due date is before today, so an overdue book appears even before the status is refreshed.

Procedure:

1. Click + > Report > List, choose Book Issues and create Returned Books; repeat to create Overdue Books.
2. In the Application IDE add the criteria [Issue_Status == "Returned"] to Returned Books.
3. Add the criteria [Issue_Status == "Overdue" || (Issue_Status == "Issued" && Due_Date < zoho.currentdate)] to Overdue Books.
4. Save both scripts and open the reports in the live application.

Program (report criteria):

```
list Returned_Books
{
    displayName = "Returned Books"
    show all rows from Book_Issues [Issue_Status == "Returned"]
    ( ... same columns as Currently Issued ... )
}

list Overdue_Books
{
    displayName = "Overdue Books"
    show all rows from Book_Issues [Issue_Status == "Overdue" || (Issue_Status ==
"Issued" && Due_Date < zoho.currentdate)]
    ( ... same columns as Currently Issued ... )
}
```

Output:

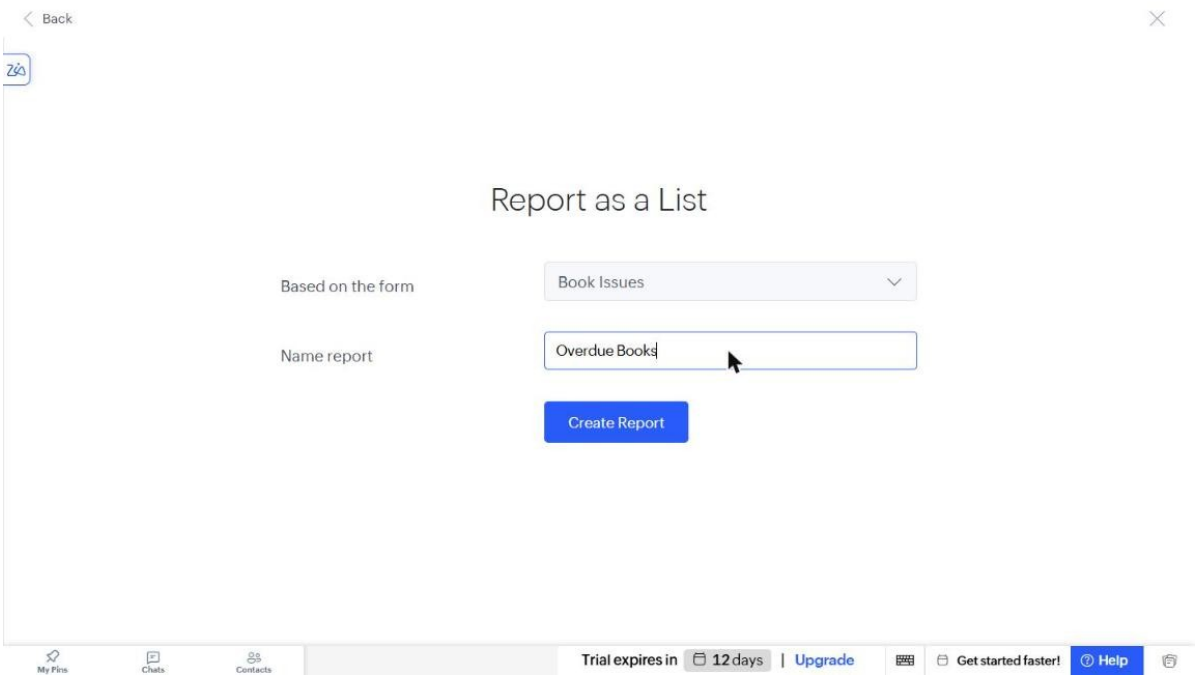

Fig. 9.1: Creating the Overdue Books list report

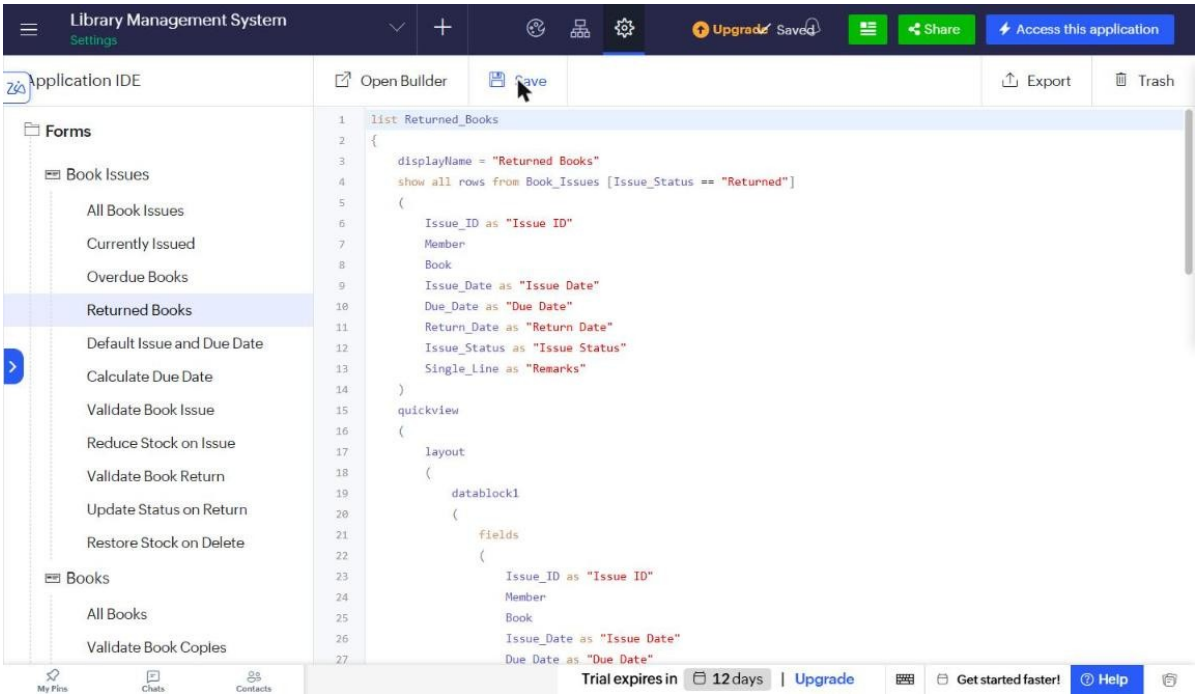

Fig. 9.2: Returned Books criteria

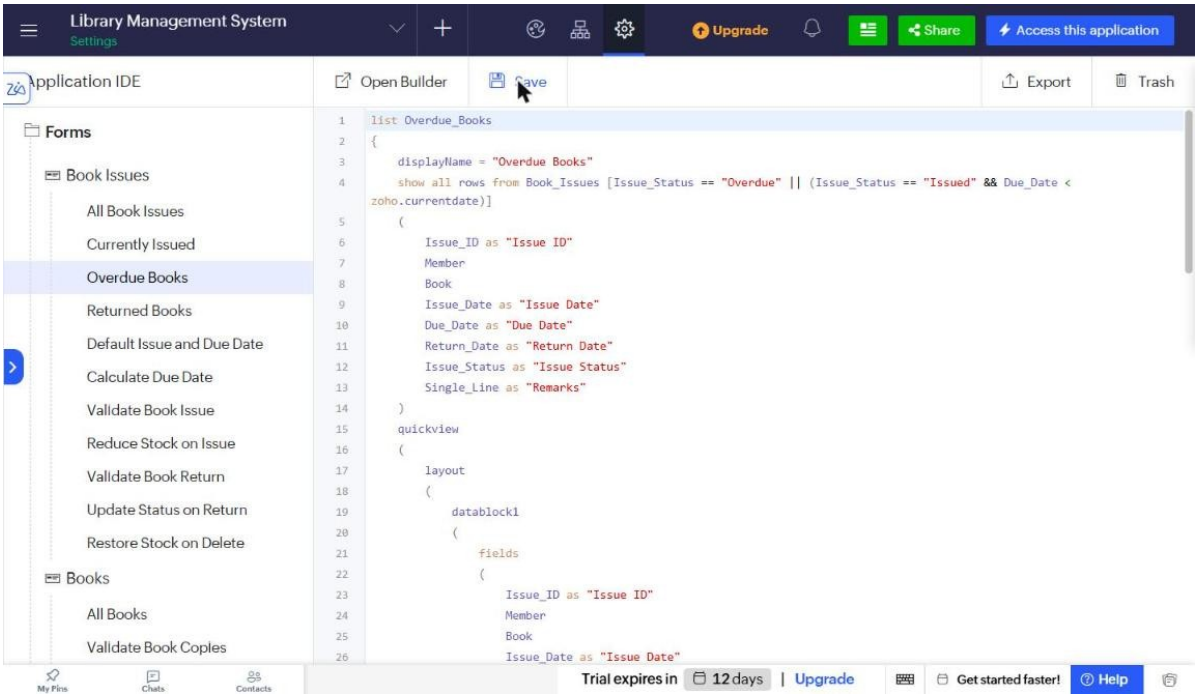

Fig. 9.3: Overdue Books criteria

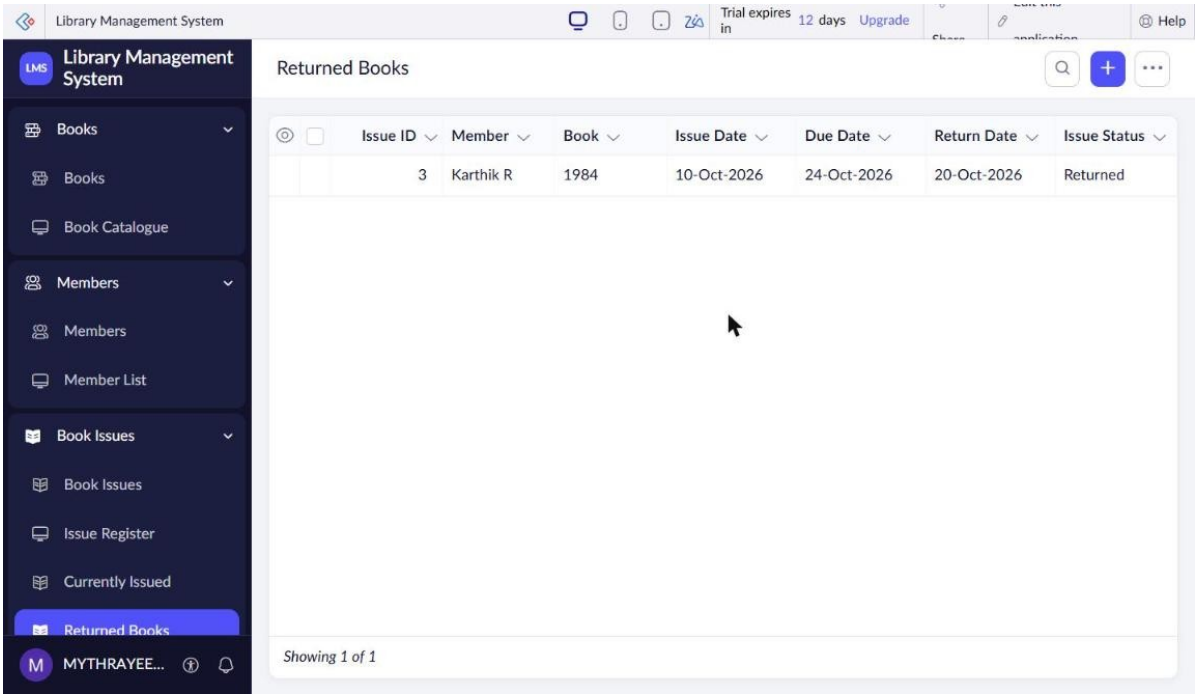

Fig. 9.4: Returned Books report

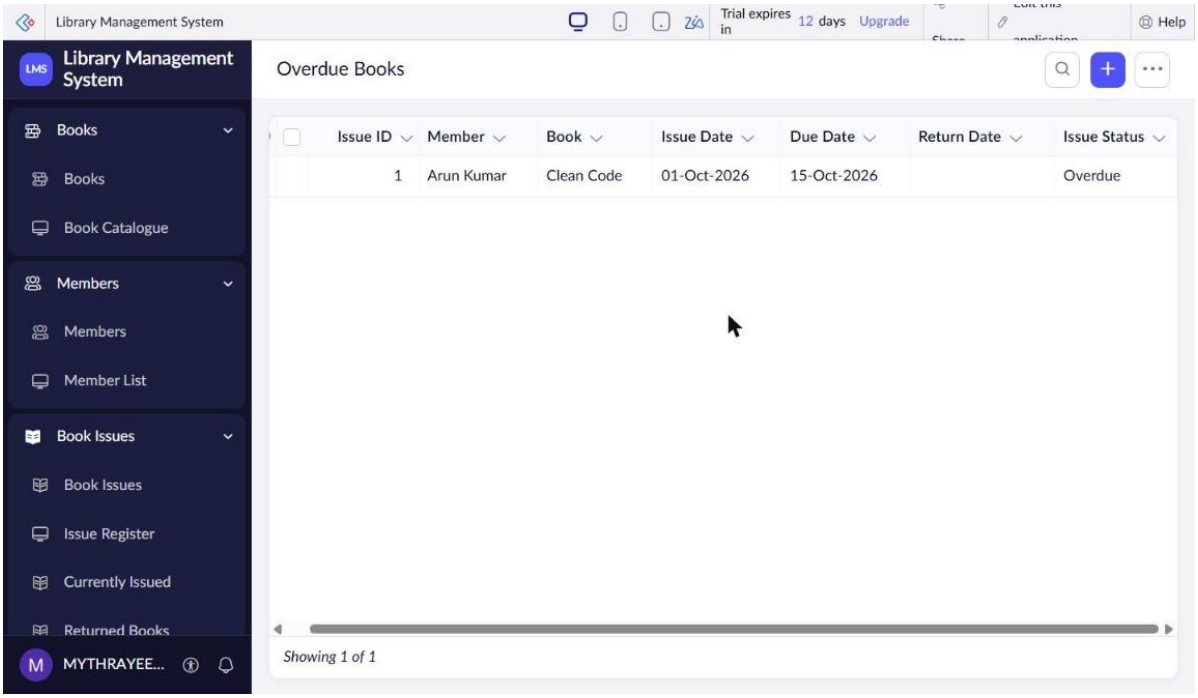

Fig. 9.5: Overdue Books report

Observation:

Report	Records shown
Returned Books	Issue 3 - Karthik R - 1984 (returned 20-Oct-2026)
Overdue Books	Issue 1 - Arun Kumar - Clean Code (due 15-Oct-2026)

Result:

The Returned Books and Overdue Books reports were created and show the correct records.
